

Perspectives on Strategic Risk Management

Torben Juul Andersen (Editor)

Copenhagen Business School Press

ISBN 87-630-0183-7

A major purpose of this anthology is to inspire our thinking about integrative risk management approaches and further considerations of effective strategic risk management. To this end the book presents a collection of contemporary articles that discuss different aspects of the strategic risk management concept with an aim of inspiring new thoughts and creating a better understanding of this complex subject. The book collects ten articles that combine the perspectives of practitioners and academics with different involvements in the risk management issue.

Reviews

"Perspectives on Strategic Risk Management represents the first serious effort to address second-generation risk management issues. Beyond compliance, controls and systems, modern risk management finds itself facing a range of challenges related to performance, value, corporate culture, and strategy. This book covers the current frontier of modern risk management issues and practices and will provide the readers with a solid foundation for understanding the state of the art issues." *Peter C. Young, Professor, E. W. Blach Chair in Risk Management, University of St. Thomas, USA.*

"Perspectives on Strategic Risk Management presents up-to-date research on the subject of risk management. Professor Andersen has brought together a competent array of authors from the field of modern risk management, and they have done a great service by contributing to our understanding with these enlightening articles. This book is an inspiring multidisciplinary examination of various approaches to strategic risk management." *Finn Kjær Jensen, Director, European Institute for Risk Management, Denmark.*
