

Presentation Description

"On Tuesday the 6th of May, Viktoria Skarler held a presentation regarding the project eSangathan during CAICT's lunch meeting.

The purpose of the presentation was to give an orientation for the CAICT members of the projects objectives and our involvement as a center within the project, which is to contribute with the methodology that is being used of the Öresund (situated in Sweden) and Mahindra & Mahindra (situated in India) pilot. The main objective of this project is to study how innovative approaches based on an intensive use of ICT (CWE) can generate ideas or perhaps models to answer the urgent European situation (made out of low employment of older workers, shortage of critical skills and decline of birth rate)."
