

Academic profile for Advanced Economics and Finance

The academic profile describes the competences and skills acquired through the Advanced Economics and Finance programme and how you can use them professionally.

The elite MSc programme in Advanced Economics and Finance is a research-based highly selective full-time graduate programme. The programme is designed for students who have demonstrated particular skills and interests in analytical and quantitative economics and finance. Students will learn to work independently with economic and financial problems and, thus, obtain qualifications to work as a key analyst in financial institutions and consultancies as well as the business community in general, wherever strong quantitative financial and economic skills are needed. The program is highly selective and only enrolls a limited number of students per year. Hence, a higher degree of attention will be given to each student.
