OT@IOA Lecture: "When practices control practitioners"

Presenters: Jörg Sydow, Freie Universität Berlin

Provocator: Tor Hernes

Date: November 7th, 14-15.30, room 1.53

Jörg Sydow is a leading organizational scholar, with wide impact in the field. He is a prolific writer, has been on the editorial board of many top journals and received several honours throughout his career, including an [EGOS Honorary Member](#). Jörg will talk about his work self-reinforcement (like escalation of commitment and path dependence) "in vivo and in situ" by connecting integrating self-reinforcing dynamics into practice-based theorizing. His work will open for a broader discussion and closer look at a life lived forward, where outcomes are necessarily uncertain, and practitioners can always choose to act differently. His take on processes, practice and temporality is different from Tor's, the provocator. We are therefore likely to experience an enlightening conversation.
