Small business and family labour. I had grants to my own salary for 3 years.

Research interests and perspectives

- Management in networks, collaborations in innovation processes. Entrepreneurial management in inter-organisational organising. New challenges to management theory from stretching management conditions, and thus how entrepreneurship contributes to the understanding of new management challenges.
- Research and innovation management and knowledge management processes in knowledge based organisations and universities. Case studies in universities, research based firms and in small IT multimedia firms. EU project on organising and collaboration models for sustainability in the energy and climate sector.
- Knowledge management perspectives under high level of uncertainty in research and in IT. Initiated a large research project Research management Processes under rapid change(REMAP) with Institute of Research Analysis, RISØ and 6 research based enterprises. Own research project on management in IT is financed under the LOK-research centre. 1999-
- Earlier projects on networks, small firms, small high tech firms and ICT-application
- In the 70es a focus on regional development, family labour, small business and demography.
