The call for expression of interest

The Department of Digitalization (DIGI) at Copenhagen Business School (CBS) welcomes expressions of interest from postdoctoral researchers with an excellent track record of research and publication to apply jointly with a supervisor from the department at CBS to the Marie Skłodowska-Curie Postdoctoral Fellowship Scheme.

Research themes

Expressions of Interest that address one or more of the following research themes are welcome.

Subject: Predictive Human Work Interaction Design

Human work interaction design (HWID) is an research areas that crosses human-computer interaction (HCI), product design, and Information systems (IS). It aims to create more meaningful relationships between people and the products and services they use in work environments, by examining and defining the interactions between a system and its user. It thus covers UX at work, human AI collaboration and more. The particular topic of this MSCA call for EOI is "predictive HWID". This topic entails studying how to support individual workers to craft their work tasks, environment, work tools, and collaboration partners, for specific future projects or jobs. Among possible assumptions for the post doc are that much human work needs to be designed or 'job crafted' by those who execute it. Furthermore, to do that in digital and hybrid workplaces, these workers needs advanced predictive HWID tools and approaches. The design research on such HWID tools and approaches will be the core of the "Predictive Human Work Interaction Design" fellowship. The outcome of the fellowship is expected to be one or more journal publication in HCI, design, or IS journals, or related journals appreciated by CBS.

Supervisor: Prof. Torkil Clemmensen

How to express your interest

Expressions of interest (EoI) should include:

1. A one-page pitch on your research project idea
2. Your CV including a full list of your publications, research grants and projects
3. A one-page motivation letter
