

Professional and Personal Profile

I am a PhD Fellow at the Department of Organization at CBS. I have a background in public health science and am passionate about minimizing inequality in health and disease. My research is focused on cancer treatment and care among patients with a mental illness. I have experience from the hospital and university sector. Further, I have engaged in projects with a social aim in the private sector and have facilitated collaboration, project development, and involvement of vulnerable individuals. Above all, I am deeply motivated to contribute to improving health and social outcomes for individuals in vulnerable situations.
